

Aluminum Brightener Concentrate

Description:

Aluminum Brightener is a concentrated mixture of detergents and acids with co-solvents for use in cleaning heavily soiled aluminum surfaces of all types.

Directions For Use:

Aluminum Brightener should be diluted with water at a rate of 1 part Aluminum Brightener Concentrate with 10 parts water prior to use. The dilute product should be sprayed or mopped on the Aluminum Surface to be cleaned and allowed to sit for a minute then rinsed clean with plenty of clean water.

The first time the cleaner is used it may be necessary to brush the surface with a brush, especially if deposits have been allowed to build up over an extended time.

Typical Properties:

BOILING POINT: 212°F

SPECIFIC GRAVITY: 1.035

VAPOR PRESSURE: approx 110mm Hg @ 20°C

PERCENT VOLATILE BY VOLUME: 89%

VAPOR DENSITY: 2.2 @ 70°F

EVAPORATION RATE (H₂O = 1): <1

SOLUBILITY IN WATER: Complete

APPEARANCE AND ODOR: Colorless liquid, sharp pungent odor, concentrate fumes in the air

pH AS RECEIVED: 2.2
