

Drain Cleaner 20

Description:

Drain Cleaner 20 is a concentrated solution of Sodium Hydroxide for use in clearing clogged drains or to improve the flow of slow drains.

Directions For Use:

Drain Cleaner 20 should be poured into slow drains at a rate of 2 to 12 oz per application depending on the size of the drain or severity of the clog. Drain Cleaner 20 should be allowed to sit in the drain for 5 to 20 minutes and then flushed clear with tap water for about 5 minutes.

For drains stopped up or backed up Drain Cleaner 20 should be added at a rate of 12 to 128 oz per application depending on the size of the drain or severity of the clog. Drain Cleaner 20 should be allowed to sit in the drain for 5 to 20 minutes and then the process repeated on the cleared drain with an additional application of 2 to 12 oz per application and again allowed to sit for 5 to 20 minutes. The repeat application should then be flushed with water for at least 5 minutes and preferably longer.

Typical Properties:

BOILING POINT: 288°F

SPECIFIC GRAVITY: 1.53

VAPOR PRESSURE: 1 mm Hg

PERCENT VOLATILE BY VOLUME: 80%

SOLUBILITY IN WATER: Complete

APPEARANCE AND ODOR: Clear white to slightly turbid liquid with no odor.

pH AS RECEIVED: >11 (estimated)
