

# Soil Rout

## Concentrated Low Foam Alkaline Cleaner

### Description:

Soil Rout is a concentrated mixture of detergents and alkaline builders with co-solvents for use in low foam cleaning applications where heavily soiled items are found. Typical applications include parts washers, carpet and upholstery extractors and floor scrubbers. Soil Rout is formulated with a pleasant, odor-absorbing fragrance.

### Directions For Use:

Soil Rout should be added at a rate of 2 to 12 oz per gallon of water for use as a carpet extractor or floor scrubber solution. The floor or carpet should then be cleaned using the equipment manufacturer's recommended practices. This dilution may also be mopped, sponged or sprayed on the soiled area, and rinse mopped, sponged, pressure washed or wiped with clean cold water. For extremely soiled areas, the undiluted product can be applied with a spray bottle, allowed to sit for a minute or two, and then sponged free, followed by a clean water rinse.

For parts washers Soil Rout may be used as a washer charging solution. Soil Rout should be used as purchased for best results on heavily soiled items, particularly when encountering greasy soils. Soil Rout may also be diluted with water as desired and added to the parts washer reservoir.

### Typical Properties:

BOILING POINT: 212 F

SPECIFIC GRAVITY: 1.05

PERCENT VOLATILE BY VOLUME: Proprietary

VAPOR DENSITY: 1

EVAPORATION RATE (H<sub>2</sub>O = 1): 1

SOLUBILITY IN WATER: Complete

APPEARANCE AND ODOR: Clear water thin yellow/green liquid with a slight butyl odor

pH AS RECEIVED: >11
